Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1656

The instant Office action is in response to Applicants' remarks received June 11, 2007 and May 23, 2007. Claims 3-9 are canceled. Claims 1-2, 10 are pending and currently under examination.

The inadvertent error on the Office action summary of the previous Office action mailed May 22, 2007 is also noted. The disposition of the claims should have been: claims 1-2, 10 are allowed and claims 4-6, 8 are rejected.

Applicants' arguments have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous Office actions are hereby withdrawn.

The indicated allowability of claims 1-2, 10 is withdrawn in view of the new 35 U.S.C. 102(e) rejections based on Bringe (US 6566134; previously cited). Rejections based on the cited reference(s) follow.

Priority: The priority date is July 19, 2002.

Objections and Rejections

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1656

Claims 1-2, 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Bringe (US 6566134; previously cited). Bringe teaches a method for preparing a dry β -conglycinin protein composition comprising a β -conglycinin content greater than 40%, the method comprising a heat treatment step, wherein the heat treatment step is selected from 80-90°C or 120-154°C, lowering the pH to precipitate protein, recovering a portion of the precipitated protein, adjusting the pH of the protein mixture to between pH 6.7-7.2, and then drying the β -conglycinin mixture (col. 38 lines 1-35; claim 10). In Example 8, Bringe teaches SPI (soy protein isolate) suspensions were prepared at 7% protein and adjusted to pH 5.6 using dilute HCl (col. 32 lines 50-55). The SPI suspension at pH 5.6 was heated to 90°C (col. 32-33, table 16) and then lowered to 20°C (col. 32 lines 62-63; claims 1-2). The temperature range of 120-154°C, as noted above by Bringe, is an alternative temperature that can be used in the heat treatment step and is an acceptable sterilization temperature (claim 10).

Applicants' had previously amended claim 1 to recite the acidic conditions of pH 3.5 to 6.0. Bringe teaches a heat treatment step at a pH of 5.6. Therefore, the instant claims are believed to be anticipated by Bringe.

No claim is allowed.
